

AMAN BANTHIA

+91-9424710260 | amanbanthia@gmail.com | IIT Delhi, New Delhi | github.com/banthia14aman

EDUCATION

MBA — Department of Management Studies, IIT Delhi
B.Tech, Electrical Engineering — MANIT Bhopal

Expected 2027
CGPA: 8.21 / 10 | 2019 – 2023

PROFESSIONAL EXPERIENCE

Digital Technology Development Program Intern | *GE Vernova*

April 2026 – June 2026

- Diagnosed MES adoption gaps across 8 global manufacturing sites through structured New Relic user-journey analysis; designed and deployed a Power BI dashboard surfacing root-cause behavioral patterns — enabling site leadership to prioritize targeted interventions and compress time-to-decision
- Designed an AI agent to autonomously scan MES dashboard coverage gaps and generate site-specific insights — eliminated manual analysis cycles and accelerated decision timelines for regional leadership across global operations

Associate Software Engineer | *MathWorks India*

Aug 2024 – Jun 2025

- Identified runtime inefficiency in core data acquisition algorithm through structured performance profiling; redesigned underlying logic to achieve 30% speed improvement — directly reducing friction for enterprise clients in automotive and semiconductor sectors
- Investigated and resolved 5+ critical C++/MATLAB defects in the Data Acquisition Toolbox; scoped downstream impact across 10,000+ global customers and shipped fixes across 3 consecutive releases (R2024b, R2025a, R2025b)
- Translated complex product trade-offs into client-ready narratives across 25+ enterprise engagements — bridging technical depth and business context to drive retention and expansion outcomes

Associate, Engineering Development Group | *MathWorks India*

Jul 2023 – Jul 2024

- Structured and resolved 100+ cross-domain technical cases with 90%+ resolution rate, building cross-industry product fluency spanning 30+ sectors — from automotive to semiconductor to academic research
- Synthesized 70+ customer queries into structured market-requirement signals; presented data-driven insights to PM team that directly informed feature roadmap prioritization across product releases
- Eliminated coordination bottlenecks by redesigning MS Teams feedback workflows — cut cross-team cycle time by 40% across a 10-member group spanning engineering, QA, and product functions

KEY PROJECTS

CaseCompass — MBA Case Prep Platform | *Personal Project (Next.js, TypeScript, Supabase)*

2026

- Owned full product lifecycle end-to-end: structured user research to define personas, mapped case prep journeys, and designed progressive disclosure UX — reducing cognitive load and improving structured problem-solving outcomes
- Built AI-powered interview simulation with percentile-ranking cluster analysis; leveraged engagement telemetry to identify skill gaps and serve targeted practice — personalizing preparation at scale for users across analytical and strategy tracks

Battery Life Prediction ML Model | *IEEE Published Research*

2023

- Designed a regression-based battery life forecasting model achieving 90% accuracy from State-of-Health data; generated 200+ Simulink charge-discharge cycles as training dataset — published as primary author in IEEE

LEADERSHIP & ACHIEVEMENTS

Campus Finalist — American Express Campus Challenge 2025 | *Decision Science Track*

2025

- Sole team selected from DMS IIT Delhi; competed against 500+ teams from premier B-schools and presented structured, data-driven business recommendations on complex analytical decision science datasets

Lead Anchor, Roobaroo Cultural Society | *MANIT Bhopal*

2020 – 2023

- Led 200+ student teams across 3 major festivals; managed budgets exceeding ₹5L and hosted 12+ formal events for audiences up to 3,000

Sponsorship Secretary, IEEE MANIT Student Branch | *MANIT Bhopal*

2020 – 2022

- Secured ₹3L in sponsorships for SCEECs 2022 (250+ participants) through strategic corporate pitches

SKILLS & CERTIFICATIONS

AI Tools

Claude Code, GitHub Copilot, Cursor, ChatGPT — proficient in agentic workflows, prompt engineering, AI-assisted product development

Technical

Python, SQL, MATLAB, C++, Power BI, Excel, Simulink, Machine Learning, Statistical Modeling, ETL

Product

Product Strategy, PRD Writing, Roadmap Prioritization, Telemetry Analysis, Stakeholder Engagement, Systems Thinking

Certs

Data Scientist Professional (Power BI, Python, ETL) · Product Management · Google Digital Marketing · Corporate Finance

Achievements

CAT 2023: 99.74 percentile (DILR) · JEE 2019: 99.74 percentile (Physics) · Promoted ahead of schedule at MathWorks
